Education

University of California, Berkeley — Berkeley, CA

Bachelor's in Data Science, Bachelor's in Economics, Minor in Computer Science — *Expected Graduation: May 2029*

Relevant Coursework: Principles and Techniques of Data Science, Data Structures, Business Analytics, Human Contexts and Ethics of Data, Discrete Mathematics and Probability Theory, Linear Algebra

Experience

Wing Assistant — Oct 2026 – Present

Product Management Intern — *Berkeley, CA*

Wing staffs 10,000+ SMBs with trained remote assistants and is now building Central AI, an AI front desk for clinics.

- Leading the PRD and prototype for Central's next product, an AI-transcribed phone dialer that takes inbound calls
- Running competitive analysis on clinic-focused rivals to find gaps in Central's patient intake, billing, and referrals

Git Machine (Berkeley SkyDeck Startup) — Jun 2026 – Aug 2026

Forward Deployed Engineer Intern — *San Francisco, CA*

Git Machine builds software that recovers wasted GPU compute so teams run more workloads on hardware they already own.

- Drove customer discovery across 20+ calls with engineers at AI, robotics, and biotech companies, then prioritized a fix for the top pain point with engineering: a no-install diagnostic showing prospects their wasted GPU compute
- A/B tested value propositions across 120+ prospects; throughput beat cost savings, lifting reply rate from 5% to 28%
- Identified 10 use cases from discovery calls and moved them into product demos, leading to 3 founder calls

LG NOVA — Feb 2026 – May 2026

Machine Learning Engineer (Contract) — *Santa Clara, CA*

LG Electronics' startup incubator; Atlas is its internal platform tracking every startup, project, and contract.

- Built Atlas' RAG chatbot so analysts could ask about their startup portfolio in plain English and not search databases
- Established a Precision@5 benchmark on 100+ analyst questions to catch chatbot accuracy drops
- Automated startup cohort reports with AI summaries by industry for analysts to get the latest trends at a glance

UCSF Yang Lab — May 2026 – Sep 2026

Data Science Researcher under Dr. Hanxue Gu — *San Francisco, CA*

- Co-authored CohortFlow (accepted to NeurIPS 2026 GenAI4Health Workshop), an AI agent that finds trial-eligible patients; co-designed it so clinicians can change criteria mid-run without restarting, cutting wait time up to 64%

FactGrid Cuneiform — Jan 2026 – Present

NLP Researcher under Dr. Adam Anderson — *Berkeley, CA*

- Fine-tuned a ByT5 model to fix OCR errors in Akkadian transliterations, cutting character errors by 74%
- Defining product requirements to turn the model into an OCR autocorrect tool for scholars on TokenWorks, a 150k-document research platform, aiming to fix pages for under 1 cent vs $1 with ChatGPT

Ithildin (Berkeley SkyDeck Startup) — Jun 2026 – Aug 2026

AI/ML Engineer Intern — *Berkeley, CA*

Deposition platform that transcribes testimony and flags inconsistencies for litigators and court reporting firms.

- Built the two-pass transcription engine since litigators review at breaks, not live: a fast draft plus an accurate record
- Benchmarked models, prioritizing speaker over word accuracy for litigators; cut DER from 20% to 13%

Projects

Data Matchmaker Benchmark AI Agent | *AgentX – AgentBeats Competition (Berkeley RDI)* — Jan 2026

- Placed 2nd in the OpenAI-sponsored Finance track with an evaluator agent that scores AI agents on data integration
- Deployed the agent to the competition platform via Docker, validating its grading end to end with a mock contestant

Equity-Focused College Matcher (EquiMatch) | *UC Berkeley 7th Annual Datathon for Social Good* — Nov 2025

- Placed 3rd of 50+ teams with a personalized college recommender for underserved students across 6,000+ institutions
- Designed an ML matching model on 10 equity factors like child care, plus an AI counselor that explains each match

Skills

Product: Customer Discovery, A/B Testing, PRDs, Prioritization, Prototyping, Agile, GTM, Evaluation Benchmarks
Technical: Python, SQL, R, Java, PyTorch, scikit-learn, Hugging Face, RAG, AI Agents, Tableau, Docker, AWS, Git
